MEMORANDUM FOR: Director of Joint Computer Support

SUBJECT : DD/M&S FY 1975 ADP Resource Requirements

1. Attached are seven DD/M&S Office responses to the ADP Call for FY 1975.
2. We have not received OJCS's response but would like to review it when completed. The Office of Finance package is unresponsive to the ADP Call; however, Plans Staff will work with OJCS/AD and Finance to improve their response.
3. Within the seven attached responses are requests for 20 new projects and cancellations of 34 FY 74 projects. Several other projects within the Offices of Personnel and Security should drop out during FY 75 as new MAP systems move into the production stage.
4. At the Directorate level we recognize several areas, especially within OTR and OMS, which could be cut back if OJCS resources cannot meet our requirements. In the main, OTR's and OMS's requests are small relative to the larger users within the Directorate. We ask your advice concerning projects which are candidates for contracting out with commercial firms (e.g., the Information Science Training Staff's six new projects).
5. Should more information be needed, we are available to assist together with the Office ADP Control Officers.

DD/M&S ADP Control Officer
